

EXHAUST ARMS

FUME EXTRACTION ARMS

Conditionaire International is an **approved** supplier and installer of fume extraction arms. Fume extraction arms are an ideal form of local extraction at a workstation or over an appliance to safely vent any residue chemicals or smells. The exhaust arms are available as ceiling or wall mounted, bench mounted or as a mobile exhaust unit.

- Nederman and Alsident branded extraction arms.
- Available in diameters of 50mm, 75mm and 100mm
- Available in manufacturers standard length – (1.1m to 2.4m)
- Available in Aluminum, Polypropylene or ATEX (anti-static)
- Multiple arms can be manifolded into the one ducting/fan system.
- We provide a full turnkey solution for supply and installation of exhaust arms, ducting and exhaust fan.

We offer a full installation and maintenance Service

Conditionaire International offers a complete installation solution as well as an ongoing testing and maintenance service. Our NATA accredited technicians provide testing reports using calibrated equipment. Airflow rates can be adjusted to balance an exhaust arm or system or add additional arms onto an existing system.
