## SERIES 1000

The Conditionaire 'Safe-Tee' Series 1000 is a ducted bench top mounted fume cupboard that complies with Australian standards AS/ NZS2243.8, AS/NZS2430.3.6, AS1530.3, AS3000 and AS2208. All Conditionaire fume cupboards are designed and manufactured in Australia.

The Safe-Tee Series 1000 fume cupboard is designed for operator protection from chemicals and contaminants used in a wide variety of laboratory applications.

It is the most versatile fume cupboard offered in the market and is completely customizable to suit a laboratories requirement. Manufactured with a single skin wall, maximizing the internal work area.

### **The Safe-Tee Series 1000 fume cupboard is designed for:**

- Schools.
- Private laboratories.
- Universities.
- Hospitals..

### **Standard Features Include:**

- ASAH (acid, solvent, alkali, heat resistant) chamber construction.
- Laboratory grade HPL Fixed work base with an anti-spill lip.
- Aerodynamic back baffles.
- Vertical sliding sash.
- Efficient and user friendly.
- Type A – Fume Cupboard compliant for NSW Schools.
- Conditionaire Version 5 controller.
- BMS compatible with low level outputs.
- LED lighting which exceeds 400 LUX.
- Single or Double sided options available.
- Constant flow or variable flow (IVAC) options.
- RCD protected DGPO.

The Conditionaire 'Safe-Tee' Series 1000 can be manufactured in: ASAH, polypropylene, stainless steel or lead lined for radioactive isotopes.
